

CIFScheck credit reports

CIFScheck online credit reports supply low-cost, high-value credit data for use within policyholders' credit management processes, giving you more certainty when applying the discretionary limit cover within your policy.

Supplied via our partnership with leading specialist N2, CIFScheck reports represent a significant saving on prevailing market rates. Reports may be ordered singly or via a keenly priced subscription service.

In addition, as well as international and consumer reports, CIFScheck also incorporates – at no extra charge – the “Keep it Live” monitoring service for UK and Irish limited and unincorporated businesses. This helps you maintain policy compliance by ensuring you continue to hold the most up-to-date credit data on trading partners.

A further benefit for policyholders is that we may give you an extra 5 per cent indemnity up to a maximum 95 per cent if you make a claim based on a valid CIFScheck report under the policy discretionary limit.

For further information and to register for the service go to www.CIFScheck.com. Or telephone 020 7903 7300.
